

## A. Specimen - earlier draft

Fixture Record 02 - superseded layout kept for the replace-file path

---

### OBJECTIVE

---

Reviewed vendor documentation and flagged the gaps before the pilot went live.  
Introduced a same-day reprint rule that removed the most common repeat visit.  
Trained four colleagues on the document handover checklist and its exceptions.

### WORK HISTORY

---

#### Counter role 1 - Specimen Branch

2019 - 2020

Agreed paper stock, duplex defaults and reprint handling with the print desk team.  
Ran the weekly service review and tracked every defect through to a closed state.  
Wrote onboarding notes covering scan, print and document pickup for new counter staff.  
Built the daily reporting sheet the branch uses for volume and exception counts.  
Handled counter escalations and logged root causes into the monthly summary.

#### Counter role 2 - Specimen Branch

2020 - 2021

Reviewed vendor documentation and flagged the gaps before the pilot went live.  
Introduced a same-day reprint rule that removed the most common repeat visit.  
Trained four colleagues on the document handover checklist and its exceptions.  
Reduced paper waste by moving the default job to duplex on the shared queue.  
Kept the shift roster and covered absence without extending counter hours.

#### Counter role 3 - Specimen Branch

2021 - 2022

Drafted the recovery steps used when the scanner trips a page mid-batch.  
Audited the archive folder monthly and cleared items past their retention date.  
Set up the exception log so repeat faults were visible instead of anecdotal.  
Worked with facilities on queue layout after the second-floor desk was added.  
Standardised the label format used on every completed pickup envelope.

## TRAINING

---

Drafted the recovery steps used when the scanner drops a page mid-batch.  
Audited the archive folder monthly and cleared items past their retention date.  
Set up the exception log so repeat faults were visible instead of anecdotal.  
Worked with facilities on queue layout after the second-floor desk was added.  
Standardised the label format used on every completed pickup envelope.  
Collected counter feedback each quarter and turned it into three concrete fixes.  
Rebuilt the walk-in intake queue and cut median handling time across the counter.  
Owned release checks for the kiosk build and wrote the regression list still in use.

## NOTES

---

Owned release checks for the kiosk build and wrote the regression list still in use.  
Agreed paper stock, duplex defaults and reprint handling with the print desk team.  
Ran the weekly service review and tracked every defect through to a closed state.  
Wrote onboarding notes covering scan, print and document pickup for new counter staff.  
Built the daily reporting sheet the branch uses for volume and exception counts.  
Handled counter escalations and logged root causes into the monthly summary.  
Reviewed vendor documentation and flagged the gaps before the pilot went live.

Superseded draft. Two pages, different type and rhythm from Fixture 01,  
so a viewer that silently substitutes one file for the other is visible.
